

Volume 10, number 5

FEBS LETTERS

October 1970

ERRATA

R.S.Gilmour, J.Paul, Role of non-histone components in determining organ specificity of rabbit chromatin, FEBS Letters (1970) 242–244.

The last sentence on page 242 should read:

The saturation values determined by double reciprocal plots were 6.8% for bone marrow chromatin, 4% for liver and thymus chromatin and 3% for kidney chromatin. The same values were found if the RNA preparations were hybridized to DNA from rabbit kidney, bone marrow or liver instead of rabbit.

p. 243, line 16:

For natural, read: unlabelled.

ADDENDUM

P.Johns and W.A.Hamilton, Respiratory control in membrane particles from *Micrococcus denitrificans*, FEBS Letters 10 (4) 246–249.

The present address of Dr. P.Johns is:

Department of Physiology-Anatomy, University of California, Berkley, California, 94720, USA.
